

GlutaMax[®] Suppository Formula 250mg.

- Carefully selected ingredients that have a regulatory effect on the central nervous system, brain function, metabolic capacity, oxygenation, detoxification and immune function.
- Features clinically evaluated homeopathic ingredients that restore regulation of the metabolic balance
- Neuroendocrine axis rebalancing mental and physical stress conditions, cellular function support, and detoxification of the extracellular matrix.
- High potency formula results in sustained release glutathione for optimal blood levels.

250mg Glutathione Suppositories are sold as a one-month supply. You can only raise glutathione at the cellular level by IV injection, inhalation of nebulized liquid Glutathione, transdermal, liposomal or by using these suppositories. Oral Glutathione is a waste of time since it digests in your stomach before it can ever reach the blood stream. Suppositories can be a superior route of delivery due to the long absorption time (5-6 hours) which gives your body and brain time to pull the glutathione into the cells. These are the highest quality, highest potency 250mg glutathione suppositories available. Look out for products that are NOT REFRIGERATED. They have already lost any potency they may have had. These are a full 250mg each and are shipped cold to maintain full potency!!

Indications and Suggested Usage:

GlutaMax contains 250mg of glutathione, the body's most powerful anti-oxidant. Antioxidants are substances or nutrients that can prevent or slow oxidative damage to our body. When our body cells use oxygen, they naturally produce free radicals (by-products), which can cause damage. Antioxidants act as "free radical scavengers" and hence prevent and repair damage done by these free radicals. GlutaMax is specifically designed for detoxification and drainage of the extracellular matrix. This enables absorption of oxygen and nutrients, allowing cellular reception to be activated by the "therapeutic molecules," thus enabling cells to perform their metabolic and respiratory function.

GlutaMax supports down regulation of constitutional proneness to deficits in central nervous system function.

GlutaMax provides a direct method for reducing toxin build up and oxidative stress. Both systemic processes may result in symptoms such as: allergies, sinusitis, Parkinson's disease, headaches, persistent skin conditions, and digestive problems, loss of mental clarity, fatigue or even chronic disease states. GlutaGenic.com provides a simple, effective method to improve quality of life by optimizing physical and physiological functions and enhance vitality. By utilizing Glutathione as part of a comprehensive detoxification and drainage treatment plan, you can find relief from the bothersome "toxic" symptoms and systemic disease process.*

Dosage and Storage Instructions:

Wash your hands thoroughly with soap and water. Keep the suppository in the refrigerator so it remains hard before removing the wrapper. Note that each suppository contains 500 mg and will need to be cut lengthwise to obtain the 250 mg dosage. Use one half, place the other half back in the wrapper, and refrigerate for later usage. Put on a finger cot or disposable glove, if desired (available at a pharmacy). Lubricate the suppository with a water soluble lubricant such as K-Y Jelly, not petroleum jelly (Vaseline). If you do not have this lubricant, moisten your rectal area with cool tap water. Lie on your side with your lower leg straightened out and your upper leg bent forward toward your stomach. Lift upper buttock to expose the rectal area. Insert the suppository, pointed end first, with your finger until it passes the muscular sphincter of the rectum, about 1: h to 1inch in infants and 1inch in adults (If not inserted past this sphincter, the suppository may pop out). Hold buttocks together for a few seconds. Remain lying down for about 5 minutes to avoid having the suppository come out. Discard used materials and wash your hands thoroughly.

Suggested dosage is 1 (one) suppository daily. Depending on your daily schedule, it is recommended that you insert the suppository prior to bed. Product is, wt. intended for oral usage. Store this product in a refrigerated climate. Keep this product away from sunlight. Please use the product within six months of purchase date for best results.
