Glutathione is the body's most powerful antioxidant and detoxifier. Glutathione is a combination of three simple building blocks of protein or amino acids – cysteine, glycine and glutamine. It is a very straightforward molecule that is produced naturally in your body. Yet exposure to toxins, waste build up, and disease process can have deleterious effects on glutathione levels. The quality of adaptive functioning is highly dependent upon adequate, stable levels of circulating glutathione. Proper supplementation with l-glutathione can play a key role in preventing damage caused by free radicals and other reactive oxygen species.*

Indications and Suggested Usage:

GlutaStat assists in persistent sinusitis, bronchitis and various upper respiratory disorders. Furthermore, there is a reduction of rhinorrhea, hyperlacrimation, sneezing and bronchospasm with regular usage of GlutaStat. The active ingredient of Glutathione in addition to carefully selected homeopathic ingredients, aid in cell nutrition support, symptom control, detoxification, and cellular immune support.

GlutaStat provides a direct method for reducing toxin build up and oxidative stress. Both systemic processes may result in symptoms such as: allergies, sinusitis, Parkinson's disease, headaches, persistent skin conditions, and digestive problems, loss of mental clarity, fatigue or even chronic disease states. In addition, GlutaStat provides reduction of immune suppression responses. GlutaGenic.com provides a simple, effective method to improve quality of life by optimizing physical and physiological functions and enhance vitality. By utilizing Glutathione as part of a comprehensive detoxification and drainage treatment plan, you can find relief from the bothersome 'toxic' symptoms and systemic disease process.*

Dosage and Storage Instructions:

Packaged in a convenient nasal spray & nebulizing delivery system, GlutaStat can be administered easily when other methods will not do. The lining of your nose is rich in blood vessels, and Glutathione can be easily absorbed into your bloodstream. Blow your nose gently before using the spray. Tilt your head slightly forward. Gently insert the nozzle tip into one nostril. Press on the other side of your nose with one finger to close off the nostril. Breathe in quickly while you squeeze the bottle to spray a dose into your nasal passage. Repeat in the other nostril. Do not blow your nose right after using the spray. Consult your health care professional before use. A typical dose is 2-4 pumps per day. If you are using this product in a nebulizer then place 1-2ml's of solution into the nebulizer and breathe the mist until contents are completely dissipated.

Please Note: This product is not for injection. If you are working with a health care provider that has prescribed nebulizing this product then this "nasal spray" can be used in a nebulizer. Included with your order is a blunt needle and syringe for this purpose. This product should be kept refrigerated to maintain full potency. Please use this product within 6 months of purchase date for best results.
